The Telecommunications Division (TD) is issuing this notice to establish the Household Income Limitation (HIL) requirement for the Universal Lifeline Telephone Service (ULTS) for 2005. Section 5.2.1. of General Order (GO) 153, adopted by Resolution T-16591 dated February 21, 2002, requires TD to adjust the HIL requirement for the ULTS annually to reflect inflation based on change in the Federal Consumer Price Index – Urban Area (CPI-U) by April 15, 2006. Further, Section 5.2.1 of GO 153 orders the Director of the TD to communicate new income levels to carriers in a letter within 5 business days of the adjustment being made. The Commission further directs the TD to order carriers to file revised tariffs effective June 1 of each year reflecting the new income levels.

The calculation to determine the change in the income limitation for the ULTS is set forth in Appendix A of this letter. Following this process, the TD has determined the revised income limits to be as follows:

Rules for Computing Income Levels (As set forth in Resolution T-16010, dated June 11, 1997)

1. The prior period income levels are multiplied by a factor of one plus the inflation factor derived from the February 2006 issue of the "U.S. Economic Outlook." (Col. A x B = C). The inflation factor to be used is the "final" CPI-U for the prior year.
2. All income level amounts are rounded to the nearest \$100. If the raw number ends in 50 or greater, it should be rounded to the next higher \$100. Examples: 17,509=17,500; 17,569=17,600.
3. The percentage increase factor is three digits to the right of the decimal. Examples: 2.0%=.020; 8.5%=.085.
4. The amount for "Each Additional Member" should be rounded to the difference between 3 and 4 household members. If the rounding differs, the amount for "Each Additional Member" should be set to the difference between 3 and 4 household members.
